INTERNSHIP

KODNEST TECHNOLOGIES

Software Development Intern | January 2024 - Present. Where I am acquiring practical skills on JAVA, MYSQL, Frontend Technologies, contributing to real world projects and learning directly from industry professionals.

PROJECTS

- **Quantum Screen Application using Spring Boot.**

The platform will enable users to stream various video content, manage user accounts. This project will cover essential functionalities including user authentication and authorization, video streaming, subscription (Payment) and responsive UI design.

Technologies used: Java, Spring Boot, HTML, CSS, JavaScript.

- **Personal Portfolio Website.**

Utilized HTML5 and CSS3 to create a fully responsive design, ensuring the website is accessible and visually appealing on various devices, including desktops, tablets and smartphones.

My roles and responsibilities were conceptualized the layout and design of the portfolio website and developed the website structure using semantic of HTML5 elements to enhance accessibility.
